

BASIC SNOW PLOWING GUIDELINES

This list of basic snow plowing procedures is not a mandatory plan of operation, but a suggested plan for Managing snow removal in the Village of Union Grove. Each storm occasion and developing conditions Require consideration of removal methods and tools for salting and plowing.

- Priority 1 roads are high traffic areas and school zones
- Priority 2 roads are roads that lead to main high traffic roads
- Priority 3 roads are all other residential areas

<u>Type of Precipitation</u>	<u>Amount of Accumulation</u>	<u>Guideline</u>
Ice Storm; Freezing Rain		Salt* all streets before ice can adhere to the roadway
Snow Flurries	Trace to 1"	Will not plow. MAY salt* intersections, hills, and curves if needed.
Snow	1"-2"	May start plowing. Continue to salt* intersections, hills, and curves if needed.
Snow	2"-5"	Will plow to maintain all streets on plow routes. Continue to salt* intersections, hills, and curves if needed.
Snow	6"+	Will continue to plow to maintain all main roadways for emergency vehicle travels. (Plow operators may be directed to clear paths for emergency vehicles)

*Using the minimal amount of salt per DNR regulations without endangering public safety.
